Geography (GRG)

Geography (GRG) Courses

**GRG 5003. Research Design and Spatial Analysis. (3-0) 3 Credit Hours.**

An investigation of the conceptualization and design of research and the analysis of spatial data. The course reviews pitfalls in research, the deductive and inductive approaches to research, the development of theory, the formulation of hypotheses, defining indicators for variables, modes of observation in data collection, sampling, and the testing of hypotheses with techniques appropriate to the level of analysis. Students will work with data sets to gain first-hand experience in research design and problem-solving.

**GRG 5303. Economic Geography. (3-0) 3 Credit Hours.**

An advanced examination of the location of economic activities, their causes and consequences. Includes the principles and practices of manufacturing and agricultural location and their impact on political subdivisions and economies, trade areas for retail and service activities, the role of transportation, the economic impact of globalization on local areas, and community economic base and shift-share analysis applied to local economies, with implications for planning and public administration. (Same as POL 5853. Credit cannot be earned for both GRG 5303 and POL 5853.)

**GRG 5323. Seminar in Urban Geography. (3-0) 3 Credit Hours.**

An advanced social and economic geography of urban areas, emphasizing intra-urban inequality, the modeling of economic dynamics, and spatial mobility to and within the city. Topics may include social area analysis, residential segregation, migration, perception and personal space in the urban environment, urban transportation, the urban economic base and its dynamics, and consumer shopping behavior in cities. May be repeated for credit when topics vary.

**GRG 5353. Seminar in Historical Geography. (3-0) 3 Credit Hours.**

Graduate level study of historical landscapes, the role of the environment, boundaries, settlement origins and patterns, origins of agriculture and industry, and the history of geography. Regional focus includes Latin America, Anglo-America, and Texas. Regional emphasis and sub-regional coverage may vary.

**GRG 5403. Seminar in Biogeography. (3-0) 3 Credit Hours.**

Biogeography is the study of the distributions of biological diversity and the reasons for these spatial patterns. This course will evaluate species diversity and abundance at present and in the past, and why these variables change over time. Foundations in ecology will be provided as needed for the understanding of spatial patterning of species. The role of biogeography under increasing human impacts and in consideration of global climate change will also be explored.

**GRG 5413. Climatology. (3-0) 3 Credit Hours.**

In-depth treatment of the elements and causes and consequences of climate and weather on a global scale. The course includes the components of climate, climatic classifications, and the interpretation of patterns and formative processes of temperature, air pressure, winds, air masses, precipitation, and storms, including attention to regional weather patterns, tornadoes and hurricanes. Emphasis is on human impacts stemming from and influencing climatic phenomena.

**GRG 5433. Environmental Landscape Management. (3-0) 3 Credit Hours.**

An assessment of management practices and policies in a variety of landscapes. In-depth evaluations of ecosystem services and land use needs, and management practices that are used to address various land use goals. Emphasis will be placed on the role of spatial scale in management and in sustainable management practices.

**GRG 5513. Geography and Culture. (3-0) 3 Credit Hours.**

An exploration of the nature and distribution of cultural landscapes and human behavior within these landscapes. Taking a global focus, the course examines the spatial diffusion of culture, regional differences in religion, language and ethnicity, environmental perception and behavior, intercultural communication, and environmental determinism and possibilism, among other topics.

**GRG 5543. Gender and Cities. (3-0) 3 Credit Hours.**

This course provides an introduction to the sub-discipline of feminist geography. It explores the distinctive contribution that geographers have made to the analysis of feminist theories. We examine how feminist scholars can benefit from geographical considerations and likewise, how geographers should recognize that space is socially produced and consequently, is gendered. As this course is offered at the graduate level, we will have a one computer lab to learn and critically think about geographic information systems (GIS) as one the most popular methodologies among geographers. Reading a wide range of interdisciplinary literature, we come to understand women and men experience cities in different ways, in relation to transportation choices, housing preferences, employment opportunities, and feelings toward urban public spaces.

**GRG 5603. Geopolitics. (3-0) 3 Credit Hours.**

Investigates the links between political power and geographic space, and the effects of geography (both human and physical) on international politics and international relations. Covers the ideas of Ratzel, Mahan, Mackinder, Spykman, Huntington, and others, in the German, French and Russian schools. Examines the role of geopolitics in current global political standoffs and conflicts.

**GRG 5753. The Geography of Development and Underdevelopment. (3-0) 3 Credit Hours.**

Advanced analysis of economic growth and social change in developing nations and regions. Investigates issues such as defining of development, major theories of development and underdevelopment, global inequalities, population growth and migration, and the role of agriculture, industry, transportation, and government and trans-governmental planning in development. (Same as POL 5753. Credit cannot be earned for both GRG 5753 and POL 5753.)

**GRG 5903. Seminar in Political Geography. (3-0) 3 Credit Hours.**

Investigates the role of the political state in society and the evolution of state organization from classical times to the present. Topics may include centrifugal and centripetal forces, geopolitics, territorial morphology, boundaries, core areas, and emerging supranationalism. (Same as POL 5903. Credit cannot be earned for both GRG 5903 and POL 5903.)

**GRG 5913. Design and Management of Geographic Information Systems. (3-0) 3 Credit Hours.**

A graduate-level introduction to the use of industry-standard GIS software. Topics include GIS data structures, system design, and methods of data exploration and analysis. The course includes discussion of issues related to planning, implementing, and managing large-scale GIS projects for research projects or organizations. (Same as POL 5913. Credit cannot be earned for both GRG 5913 and POL 5913.)
GRG 6893. Master’s Thesis Proposal. (0-0) 3 Credit Hours.
Prerequisites: Permission of the Thesis Advisor or Faculty Subfield Advisor, course instructor, and Graduate Advisor of Record. An examination of the research questions and the theoretical and methodological assumptions that characterize different subfields in Geography. As part of this course, the student will develop, prepare and defend a proposal for the Master’s thesis. Credit will be awarded upon approval of the proposal by the student’s course instructor and thesis advisor. A thesis committee must be formed by the end of the course. This course will be taken in the student’s third long semester in the program. Failure to meet this requirement within four long semesters from the time when the student enters the graduate program will preclude continuation of the student in the Master’s program.

GRG 6951. Independent Study. (0-0) 1 Credit Hour.
Prerequisites: Graduate standing and permission in writing (form available) of the instructor and the student’s Graduate Advisor of Record. Independent reading, research, discussion, and/or writing under the direction of a faculty member. For students needing specialized work not usually available as part of the regular course offerings. May be repeated for credit, but not more than 6 hours, regardless of discipline, will apply to the Master’s degree.

GRG 6952. Independent Study. (0-0) 2 Credit Hours.
Prerequisites: Graduate standing and permission in writing (form available) of the instructor and the student’s Graduate Advisor of Record. Independent reading, research, discussion, and/or writing under the direction of a faculty member. For students needing specialized work not usually available as part of the regular course offerings. May be repeated for credit, but not more than 6 hours, regardless of discipline, will apply to the Master’s degree.

GRG 6953. Independent Study. (0-0) 3 Credit Hours.
Prerequisites: Graduate standing and permission in writing (form available) of the instructor and the student’s Graduate Advisor of Record. Independent reading, research, discussion, and/or writing under the direction of a faculty member. For students needing specialized work not usually available as part of the regular course offerings. May be repeated for credit, but not more than 6 hours, regardless of discipline, will apply to the Master’s degree.

GRG 6961. Comprehensive Examination. (0-0) 1 Credit Hour.
Prerequisites: Approval of the Faculty Subfield Advisor, Graduate Advisor of Record, and the student’s Comprehensive Examination Committee. Students will select fields of study and prepare for examination under faculty supervision. Students will designate an exam committee and exam chair in the semester prior to enrollment. Enrollment is required each term in which the Comprehensive Examination is taken if no other courses are being taken that term. May be repeated once during a different semester. Credit earned in GRG 6961 may not be counted toward the Master’s degree. The grade report for the course is either “CR” (satisfactory performance on the Comprehensive Examination) or “NC” (unsatisfactory performance on the Comprehensive Examination).

GRG 6963. Internship. (0-0) 3 Credit Hours.
Practical experience in a workplace setting in which classroom knowledge of geographic skills and concepts can be deepened and applied. May be repeated for credit to a maximum of 6 hours.

GRG 6966. Internship. (0-0) 6 Credit Hours.
Practical experience in a workplace setting in which classroom knowledge of geographic skills and concepts can be deepened and applied. May be repeated for credit to a maximum of 6 hours.

GRG 6973. Special Problems. (3-0) 3 Credit Hours.
Prerequisite: Consent of instructor. An organized course offering the opportunity for specialized study not usually available as part of the regular course offerings. Special Problems courses may be repeated for credit when topics vary, but not more than 6 hours, regardless of discipline, will apply to the Master’s degree.

GRG 6983. Master’s Thesis. (0-0) 3 Credit Hours.
Prerequisites: POL 6893 and permission of Graduate Advisor of Record and Thesis Committee. Thesis research and preparation. May be repeated for credit, but not more than 3 hours will apply to the Master’s degree. Credit will be awarded upon completion of the thesis. Enrollment is required each term in which the thesis is in progress.
