DEPARTMENT OF COMPUTER SCIENCE

The Department of Computer Science offers a Master of Science degree in Computer Science, a Master of Science degree in Cybersecurity Science, and a Doctor of Philosophy degree in Computer Science.

- M.S. in Computer Science (p. 1)
- M.S. in Cybersecurity Science (p. 2)
- Ph.D. in Computer Science (p. 2)

Master of Science Degree in Computer Science

The Master of Science (M.S.) degree in Computer Science offers integrated studies involving software and hardware. A thesis option is available for students who wish to obtain research experience. The Department of Computer Science also offers Concentrations in Cybersecurity, Software Engineering, and Data Science as part of the Master of Science degree.

The regulations for this degree comply with the general University regulations (refer to Student Policies, General Academic Regulations, and Chapter 4, Master’s Degree Regulations).

Admission Requirements

The minimum requirements for admission to the Master of Science degree program in Computer Science, in addition to University-wide graduate admission requirements, are as follows:

- A B.A. or B.S. degree in computer science equivalent to that offered by UTSA
- Two letters of recommendation attesting to the applicant’s readiness for graduate study
- Professional résumé or curriculum vitae
- Statement of purpose

Satisfying the minimum requirements does not guarantee admission. Students who do not qualify for unconditional admission may be admitted on a conditional basis. Students who are admitted on a conditional basis may be required to complete specific undergraduate courses as conditions of admission. If such courses are listed as deficiencies, they will not count toward the graduate degree. In such cases, students should anticipate that additional time will be required to complete the degree.

Degree Requirements

Candidates for the degree are required to successfully complete a minimum of 30 semester credit hours of graduate coursework as described in the program of study.

Program of Study
A. Core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 5363</td>
<td>Programming Languages and Compilers</td>
</tr>
<tr>
<td>CS 5513</td>
<td>Computer Architecture</td>
</tr>
<tr>
<td>CS 5523</td>
<td>Operating Systems</td>
</tr>
<tr>
<td>CS 5633</td>
<td>Analysis of Algorithms</td>
</tr>
</tbody>
</table>

B. Electives:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</thead>
<tbody>
<tr>
<td>CS 5363</td>
<td>Programming Languages and Compilers</td>
</tr>
<tr>
<td>CS 5513</td>
<td>Computer Architecture</td>
</tr>
<tr>
<td>CS 5523</td>
<td>Operating Systems</td>
</tr>
<tr>
<td>CS 5633</td>
<td>Analysis of Algorithms</td>
</tr>
</tbody>
</table>

Total Credit Hours: 30

Students must complete at least 12 semester credit hours of additional eligible graduate courses. With prior approval of the Graduate Advisor of Record, students may apply a maximum of 6 hours of graduate courses from other disciplines to the degree.

C. Master’s thesis or additional electives: 6

Students must either write a master’s thesis and enroll in a minimum of 6 semester credit hours of CS 6981 or 6983 or complete 6 hours of additional graduate coursework in the Department of Computer Science.

D. Final oral examination:

Students must pass a final comprehensive oral examination for completion of the degree program.

Total Credit Hours: 30

Concentration in Cybersecurity

This concentration gives an overview of issues in computer and information security along with detailed technical experience in several specialty areas. All students pursuing this concentration must fulfill the degree requirements for the Master of Science in Computer Science. As part of the electives for the degree, students must take the following course:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 5323</td>
<td>Principles of Cyber Security</td>
</tr>
</tbody>
</table>

Select two of the following courses: 6

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 5343</td>
<td>Developing Secure Systems and Software</td>
</tr>
<tr>
<td>CS 6353</td>
<td>Unix and Network Security</td>
</tr>
<tr>
<td>CS 6373</td>
<td>Applied Cryptography</td>
</tr>
<tr>
<td>CS 6393</td>
<td>Advanced Topics in Computer Security</td>
</tr>
</tbody>
</table>

Total Credit Hours: 9

Concentration in Software Engineering

This concentration gives students a broad knowledge of current theories, models, and techniques in software engineering to provide a basis for problem identification and analysis, software design, development, implementation, verification, and documentation. All students pursuing this concentration must fulfill the degree requirements for the Master of Science in Computer Science. As part of the electives for the degree, students must take the following course:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 5103</td>
<td>Software Engineering</td>
</tr>
</tbody>
</table>

Select two of the following courses: 6

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</thead>
<tbody>
<tr>
<td>CS 5123</td>
<td>Software Testing and Quality Assurance</td>
</tr>
<tr>
<td>CS 5153</td>
<td>User Interfaces and Usability</td>
</tr>
<tr>
<td>CS 5343</td>
<td>Developing Secure Systems and Software</td>
</tr>
<tr>
<td>CS 6133</td>
<td>Software Specification and Verification</td>
</tr>
</tbody>
</table>

Total Credit Hours: 9

Concentration in Data Science

This concentration provides students with the fundamental knowledge in data management, machine learning, data mining, statistics, data visualization, and communicating data. Students will have opportunities to specialize in applications such as health and life sciences as well as to learn critical, generalizable skills. All students pursuing this concentration must fulfill the degree requirements for the Master of Science in Computer Science. As part of the electives for the degree, students must take the following courses:
Master of Science Degree in Cybersecurity Science

The Master of Science (M.S.) degree in Cybersecurity Science offers a comprehensive and hands-on education in the area of Cybersecurity. The program provides students with a broad exposure to the highly dynamic Cybersecurity discipline along with a deep technical and scientific understanding of the related concepts, tools and techniques.

The regulations for this degree comply with the general University regulations (refer to Student Policies, General Academic Regulations, and Chapter 4, Master's Degree Regulations).

Admission Requirements

In addition to satisfying the University-wide graduate admission requirements, a Bachelor degree in Computer Science or related majors is required. Students who do not qualify for unconditional admission may be admitted on a conditional basis. Students who are admitted on a conditional basis may be required to complete specific undergraduate (or bridge) courses as conditions offer admission. If such courses are listed as deficiencies, they will not count toward the graduate degree. In such cases, students should anticipate that additional time will be required to complete the degree.

Degree Requirements

Candidates for the degree are required to successfully complete a minimum of 30 semester credit hours of graduate coursework as described in the program of study below.

Program of Study

A. Core courses:
- CS 5323 Principles of Cyber Security
- CS 5713 Practical Attack and Defense Techniques

B. Required Computer Science courses
- CS 5233 Artificial Intelligence
- CS 5363 Programming Languages and Compilers
- CS 5443 Database Management Systems
- CS 5513 Computer Architecture
- CS 5523 Operating Systems
- CS 5573 Cloud Computing
- CS 5633 Analysis of Algorithms
- CS 6243 Machine Learning
- CS 6543 Networks

C. Required Electives:

D. Other Electives:

E. Master's thesis or additional electives:

F. Final oral examination:

Total Credit Hours 30

Doctor of Philosophy Degree in Computer Science

The Department of Computer Science offers advanced coursework and research leading to the Doctor of Philosophy (Ph.D.) degree in Computer Science. Successful Ph.D. candidates must demonstrate an in-depth knowledge of computer science and must deliver an original contribution to the field.

The regulations for this degree comply with the general University regulations (refer to Student Policies, General Academic Regulations, and the Graduate Catalog, Doctoral Degree Regulations).

Admission Requirements

The minimum requirements for admission to the Doctoral degree program in Computer Science in addition to University-wide graduate admission requirements are as follows:

- A B.A., B.S., or M.S. degree in computer science or a related area
- The Graduate Record Examination (GRE) general test—verbal, quantitative, and analytical sections. When GRE scores are used to determine admission, applicants will be compared to applicants with similar socioeconomic backgrounds
- Three letters of recommendation attesting to the applicant’s readiness for doctoral study
- Professional résumé or curriculum vitae
- Statement of research experience and interest

Admission is competitive. Satisfying the minimum requirements does not guarantee admission. Applicants will automatically be considered for scholarships and teaching and research assistantships.
**Degree Requirements**
Candidates for the degree are required to successfully complete a minimum of 72 semester credit hours of graduate coursework as described in the program of study.

**Program of Study**

**A. Core courses:**
- CS 5363 Programming Languages and Compilers
- CS 5513 Computer Architecture
- CS 5523 Operating Systems
- CS 5633 Analysis of Algorithms

**B. Electives:**
Students must complete at least 12 semester credit hours of additional eligible, organized graduate courses in the Department of Computer Science.

**C. Other Requirements:**
- Students must complete at least 48 semester credit hours of additional courses including:
  - A minimum of 3 semester credit hours of the following:
    - CS 7123 Research Methods
  - A minimum of 18 semester credit hours of the following:
    - CS 7211 Doctoral Research
    - CS 7212 Doctoral Research
    - CS 7213 Doctoral Research
    - CS 7216 Doctoral Research

A minimum of 9 semester credit hours of the following:
- CS 7311 Doctoral Dissertation
- CS 7312 Doctoral Dissertation
- CS 7313 Doctoral Dissertation
- CS 7316 Doctoral Dissertation

With prior approval of the Graduate Advisor of Record, students may apply a maximum of 6 hours of graduate courses from other disciplines to the degree.

Total Credit Hours 72

**Transfer of Credit**
Students may transfer prior graduate study up to 30 semester credit hours from another institution toward the Doctor of Philosophy degree in Computer Science with the approval of the Graduate Studies Committee. Each student’s transcript will be evaluated by the Graduate Studies Committee, and credit will be determined on a course-by-course basis to satisfy the requirements of the degree.

**Admission to Candidacy**
Students seeking a doctoral degree must be admitted to candidacy. The requirements for admission to candidacy are as follows:

- Achieve a grade point average of 3.3 or better in three required core courses, which include CS 5633 Analysis of Algorithms, CS 5523 Operating Systems, and one of CS 5513 Computer Architecture and CS 5363 Programming Languages and Compilers
- Pass the Doctoral Dissertation Proposal Examination

Students should consult the University’s Doctoral Degree Regulations in the Graduate Catalog for other requirements.

**Doctoral Dissertation Proposal Examination**
The Doctoral Dissertation Proposal Examination is an oral examination administered and evaluated by the student’s Dissertation Committee and covers the proposal of a dissertation research. The student must submit a written proposal prior to the examination. The Doctoral Dissertation Proposal Examination consists of a formal presentation of the dissertation proposal followed by an oral examination. Unanimous approval of the Dissertation Committee is required to pass the examination.

**Doctoral Dissertation and Final Oral Examination**
Students seeking a doctoral degree must submit a Doctoral Dissertation and pass a Final Oral Examination. The Final Oral Examination is administered and evaluated by the student’s Dissertation Committee and covers the dissertation and the general field of the dissertation. The Final Oral Examination consists of an open presentation of the dissertation followed by an oral examination. Unanimous approval of the Dissertation Committee is required to pass the Final Oral Examination. Also, the Doctoral Dissertation must be unanimously approved by the Dissertation Committee.

**Graduate Certificate in Cloud Computing**
The graduate certificate in Cloud Computing is a 12-semester-credit-hour program designed to equip technical professionals with the knowledge and technical skills necessary for a career in an organization that leverages cloud computing. The wide-range of use of cloud computing in today’s business, government and academic environments requires a broad range of competencies and understanding of how cloud computing influences a particular area. This certificate is designed to give a common framework of understanding cloud computing, as well as allow for specialization in specific areas, such as, cyber-security, cloud-infrastructure, and applications in cloud.

The certificate is administered by the College of Engineering in conjunction with the College of Business and the College of Sciences. The course requirements for each program focus may be found under the College of Engineering (http://catalog.utsa.edu/graduate/engineering/#certificatetestext), the Department of Computer Science, and the Department of Information Systems and Cyber Security (http://catalog.utsa.edu/graduate/business/informationsystems/cybersecurity/#certificatetestext).

**Certificate Requirements**
To satisfy the requirements for the Graduate Certificate in Cloud Computing, students must complete 12 semester credit hours as follows:

**A. Required Course**
- CS 5573 Cloud Computing

**B. Track Electives**
- CS 5233 Artificial Intelligence
- CS 5263 Bioinformatics

Students must complete the following track electives:

**Applications Track**
- CS 5233 Artificial Intelligence
- CS 5263 Bioinformatics

Students must complete 3 semester credit hours in one of the following tracks:

- Select one entry course:
  - CS 5573 Cloud Computing
- Or a cross-listed course in EE and IS. The entry course is taught through team teaching in which instructor from each college contributes to the subjects outlined in the course syllabus.
CS 5443  Database Management Systems
CS 5463  Topics in Computer Science
CS 5473  Data Mining
CS 5493  Large-Scale Data Management
CS 6243  Machine Learning

Security Track
CS 5323  Principles of Cyber Security
CS 6353  Unix and Network Security
CS 6393  Advanced Topics in Computer Security
IS 6363  Digital Forensics

Infrastructure Track
CS 5103  Software Engineering
CS 5123  Software Testing and Quality Assurance
CS 6463  Advanced Topics in Computer Science
CS 6463  Advanced Topics in Computer Science (Topic: Parallel and Distribute Systems Software)
CS 6543  Networks
CS 6553  Performance Evaluation
CS 6643  Parallel Processing

C. Capstone Project 3
Select one course from the following (topics should be in the field of Cloud Computing):
CS 5973  Directed Research
CS 6953  Independent Study

Total Credit Hours 12

Computer Science (CS) Courses

CS 5013. Fundamentals of Software. (3-0) 3 Credit Hours.
Prerequisite: Graduate standing in Computer Science or consent of instructor. This course is a bridge course for graduate students who do not have a bachelor degree in Computer Science. It cannot be applied to the graduate degree in computer science. Topics include discrete math, advanced data structure and basic algorithms, such as binary tree and stack, as well as system programming basics and concepts of compilation. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5023. Fundamentals of Systems. (3-0) 3 Credit Hours.
Prerequisite: Graduate standing in Computer Science or consent of instructor. This course is a bridge course for graduate students who do not have a bachelor degree in Computer Science. It cannot be applied to the graduate degrees in computer science. Topics include basic concepts and knowledge in computer organization, architecture, operating systems and compilers. Differential Tuition: $150. Course Fee: GS01 $90.

CS 5103. Software Engineering. (3-0) 3 Credit Hours.
Prerequisite: CS 4773 or software development experience. Introduction to methods and tools for the requirements analysis and design stages of software life cycles. Discussion of software requirements including elicitation, modeling notations, analysis, and documentation. Brief overview of process models and project management. Examination of major architectural styles in existing software systems, design methods, design patterns, and reverse engineering. Course will include design experience using CASE tools. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5113. Computer Graphics. (3-0) 3 Credit Hours.
Prerequisites: CS 3343 and MAT 2233. Topics include display device coordinate system, 2D and 3D geometric transformations, scene interaction and animation, algorithms for drawing primitives such as lines, circles, curves and polygons, perspectives in 3D, hidden-line elimination, interactive lighting models, shadow generation, rendering and global illumination. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5123. Software Testing and Quality Assurance. (3-0) 3 Credit Hours.
Prerequisite: CS 4773 or software development experience. Introduction of testing techniques for software systems: unit testing, integration testing, system testing, acceptance testing, and regression testing; test plan and test case design; quality assurance; verification and validation. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5133. Introduction to Artificial Intelligence for All. (3-0) 3 Credit Hours.
Prerequisite: Graduate standing in Computer Science or consent of instructor. This course provides a gentle introduction to the fundamental AI concepts including machine learning and neural networks, hands-on programming of AI systems, and ethics of AI at build, train, and deploy phases. Differential Tuition: $150. Course Fee: GS01 $90.

CS 5153. User Interfaces and Usability. (3-0) 3 Credit Hours.
Prerequisite: CS 4773 or software development experience. This course focuses on the development of high-quality user interfaces. The course reviews the basics of user interface development, tools, and use-case driven design techniques; examines the elements of good design and usability, metrics for usability, and procedures for user testing. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5163. Data Science. (3-0) 3 Credit Hours.
Prerequisite: CS 3343 or consent of instructor. This course covers the fundamentals of data science. Topics include data management, data pre-processing, data visualization, data dissemination, and the mathematical and statistical foundations for data modeling. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5233. Artificial Intelligence. (3-0) 3 Credit Hours.
Prerequisite: CS 3343. This course covers the construction of programs that exhibit intelligence in solving problems. Major topics include searching, game playing, constraint satisfaction, decisions and probabilistic reasoning, machine learning, neural networks, computer vision and natural language understanding. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5243. Computer Vision. (3-0) 3 Credit Hours.
Prerequisites: CS 3343 and MAT 2233 or an equivalent. Topics include image formation, geometry and transformations, multi-view geometry and 3D reconstruction, camera calibration, feature detection and matching, estimation and tracking, image classification, object detection and scene understanding. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5263. Bioinformatics. (3-0) 3 Credit Hours.
Prerequisite: Graduate standing in Computer Science or consent of instructor. Introduction to bioinformatics. Problem areas such as sequence analysis and gene component analysis, structure prediction, gene ontology, phylogenetic inference, gene regulation, and pathway construction and analysis will be approached from a computational viewpoint. (Same as BME 6323. Credit cannot be earned for both BME 6323 and CS 5263.) Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.
CS 5273. Penetration Testing. (3-0) 3 Credit Hours.
Prerequisite: CS 3873. Introduction to the principles and techniques associated with the cybersecurity practice known as penetration testing or ethical hacking. Topics include planning, reconnaissance, scanning, exploitation, post-exploitation, and result reporting. The student learns to use pentration testing tools, discover system vulnerabilities, and avoid exploitation of vulnerabilities. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5323. Principles of Cyber Security. (3-0) 3 Credit Hours.
Prerequisites: CS 3733 and CS 3873. An introduction to the protection of computer systems and networks. Topics include authentication, access controls, malicious logic, formal security methods, assurance and trust in computer systems and networks, firewalls, auditing and intrusion detection, cryptography and information hiding, risk management, computer forensics, and ethics. (Formerly titled Principles of Computer and Information Security.) Differential Tuition: $150. Course Fees: GS01 $90.

CS 5343. Developing Secure Systems and Software. (3-0) 3 Credit Hours.
Prerequisite: CS 3733. An examination of methods for designing secure computer systems, networks, and software. Topics include the security development process, security policies and models, threat modeling, security code reviews and testing, the formal verification process, validation, and assessments. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5353. Formal Languages, Automata, and Theory of Computation. (3-0) 3 Credit Hours.
Prerequisites: CS 2233 and CS 3343. Formal models of computation and syntax such as Turing machines, finite automata, non-determinism, formal languages, regular and context free grammars, complexity classes and NP-completeness. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5363. Programming Languages and Compilers. (3-0) 3 Credit Hours.
Prerequisite: CS 2233 and CS 3343. A study of programming languages with an emphasis on their implementation. Topics include lexical analysis, language syntax, control structures, the binding of names, procedures, and their implementation in compilers. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5443. Database Management Systems. (3-0) 3 Credit Hours.
Prerequisite: CS 3743. Design and implementation of database management systems. Topics include storage management, query optimization, concurrency control, crash recovery, integrity, and security in relational databases, object-oriented databases, object-relational databases, parallel databases, and distributed databases. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5453. Penetration Testing. (3-0) 3 Credit Hours.
Prerequisite: CS 3873. Introduction to the principles and techniques associated with the cybersecurity practice known as penetration testing or ethical hacking. Topics include planning, reconnaissance, scanning, exploitation, post-exploitation, and result reporting. The student learns to use penetration testing tools, discover system vulnerabilities and avoid exploitation of vulnerabilities. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5463. Topics in Computer Science. (3-0) 3 Credit Hours.
Prerequisite: Graduate standing in Computer Science or consent of instructor. Topics in an area of computer science. May be repeated for credit when topics vary. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5473. Data Mining. (3-0) 3 Credit Hours.
Prerequisites: CS 3343 or consent of instructor. Concepts, principles, algorithms, performance, and applications of data mining and knowledge discovery. Topics may include data preprocessing, classification and prediction, clustering analysis, association and pattern analysis, outlier detection, and data mining software. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5483. Topics in Data Science. (3-0) 3 Credit Hours.
Prerequisite: CS 5163. Specialized topics in an area of data science. May be repeated for credit when topics vary. (Credit cannot be earned for both CS 5483 and CS 4973 on the same topic). Differential Tuition: $150. Course Fees: GS01 $90.

CS 5493. Large-Scale Data Management. (3-0) 3 Credit Hours.
Prerequisite: Graduate student standing in Computer Science or permission of instructor. Modern big data systems managing 3 Vs of big data (variety, volume, and velocity). Topics include, but not limited to overview of classic data management, web search, information retrieval, MapReduce, data integration, natural language processing at scale. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5513. Computer Architecture. (3-0) 3 Credit Hours.
Prerequisites: CS 3733 and CS 3853. Study of modern computer architecture, including parallel computers, multiprocessors, pipelines, and fault tolerance. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5523. Operating Systems. (3-0) 3 Credit Hours.
Prerequisites: CS 3733 and CS 3853. Operating systems concepts with an emphasis on distributed systems. Topics include process management and threads, inter-process communication, distributed objects and remote invocation, distributed naming and directory services, distributed file systems, middleware such as CORBA, access control and security. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5573. Cloud Computing. (3-0) 3 Credit Hours.
Prerequisites: CS 3733 and CS 3853. Introduction to Cloud Computing. A study of the system architecture, enabling technologies, software environment, and innovative applications of the Cloud Computing paradigm. Topics include data center virtualization, cloud platforms, cloud resource management, cloud programming and software environments, big data processing in the cloud, cloud performance and energy efficiency analysis. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5583. Kernel Concepts and Programming. (3-0) 3 Credit Hours.
Prerequisite: CS 3733. Topics include system booting, memory management, process and scheduling, interrupt handling, system calls, file systems, networking, device drivers and module programming, runtime systems. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5593. Multi-Agent Systems. (3-0) 3 Credit Hours.
Prerequisite: CS 5233. This course covers the theory and the approaches where more than one autonomous agent interacts with each other either in a cooperative or competitive manner. Topics include agent theory, agent architecture, agent communication, agent interaction, team organization, distributed rational decision making, and learning in multi-agent environment. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5623. Simulation Techniques. (3-0) 3 Credit Hours.
Prerequisites: CS 2123 and any statistics course. This course introduces discrete-event simulation techniques, statistical models in simulation, random number generation, input modeling, output analysis and comparisons, and verification and validation of simulation models. Differential Tuition: $150. Course Fees: GS01 $90.
CS 5633. Analysis of Algorithms. (3-0) 3 Credit Hours.
Prerequisite: CS 3343. Models of computation and algorithm design and analysis techniques such as divide-and-conquer, greedy algorithms, dynamic programming, graph algorithms, amortized analysis. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5713. Practical Attack and Defense Techniques. (3-0) 3 Credit Hours.
Prerequisite: CS 5323. This course will provide a comprehensive hands-on experience on various open-source software tools and techniques for conducting information gathering, vulnerability analysis, web application analysis, password cracking, wireless attacks, network sniffing and spoofing, software exploits and reverse engineering, social engineering, forensics and post-exploitation services. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5723. Crypto Currencies and Bitcoins. (3-0) 3 Credit Hours.
Prerequisites: CS 5323 or any introductory graduate level information/cybersecurity course. Study of public permission-less blockchains and its applications with an emphasis on Bitcoins. Topics include Blockchain fundamentals, Operation of the Bitcoin cryptocurrency, Bitcoin security, User privacy and anonymity in Bitcoin, Bitcoin as a distributed application platform, Bitcoin and cryptocurrency regulation, Future of Bitcoins and cryptocurrencies, Ethereum and Smart Contracts. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5733. Privacy Enhancing Techniques. (3-0) 3 Credit Hours.
Prerequisites: CS 5323 or permission of instructor. This course will introduce theoretical foundations and practical implementations of the various state-of-the-art privacy enhancing techniques (PETS) that provide web anonymity, location privacy, data privacy, social network privacy and other forms of contextual privacy in traditional web, mobile, internet of things (IoT) and cyber-physical system (CPS) applications. Differential Tuition: $150. Course Fees: GS01 $90.

CS 5933. Internship in Computer Science. (0-0) 3 Credit Hours.
Prerequisites: An overall 3.0 grade point average, and permission in writing from the instructor, the Department Chair, and the Dean of the College of Sciences. The opportunity for a semester-long work experience in a private business or public agency in a computer science-related position. Not more than 3 semester credit hours of CS 5933, and not more than a total of 6 semester credit hours of CS 5933 and CS 6953 may count toward the Master of Science degree or Ph.D. degree in Computer Science. The grade report for this course is either "CR" (satisfactory participation in the internship) or "NC" (unsatisfactory participation in the internship). Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 5971. Directed Research. (0-0) 1 Credit Hour.
Prerequisites: Graduate standing in Computer Science and permission in writing (form available) of the instructor and the Graduate Advisor of Record. The directed research course may involve either a laboratory or a theoretical problem. May be repeated for credit, but not more than 6 hours of CS 5971, CS 5973, and CS 6953, regardless of discipline, will apply to a degree. This course will not apply to the Ph.D. degree. Differential Tuition: $50. Course Fees: GS01 $30; IUCS $15.

CS 5972. Directed Research. (0-0) 2 Credit Hours.
Prerequisites: Graduate standing in Computer Science and permission in writing (form available) of the instructor and the Graduate Advisor of Record. The directed research course may involve either a laboratory or a theoretical problem. May be repeated for credit, but not more than 6 hours of CS 5971, CS 5972, CS 5973, and CS 6953, regardless of discipline, will apply to a degree. This course will not apply to the Ph.D. degree. Differential Tuition: $100. Course Fees: GS01 $60; IUCS $30.

CS 5973. Directed Research. (0-0) 3 Credit Hours.
Prerequisites: Graduate standing in Computer Science and permission in writing (form available) of the instructor and the Graduate Advisor of Record. The directed research course may involve either a laboratory or a theoretical problem. May be repeated for credit, but not more than 6 hours of CS 5971, CS 5973, and CS 6953, regardless of discipline, will apply to a degree. This course will not apply to the Ph.D. degree. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 6133. Software Specification and Verification. (3-0) 3 Credit Hours.
Prerequisite: CS 5103. This course introduces the theory and practice of formal methods for the specification and verification of computer-based systems. It emphasizes various techniques for modeling behavior of sequential and concurrent systems and reasoning about properties of models using automated analysis tools. Differential Tuition: $150. Course Fees: GS01 $90.

CS 6243. Machine Learning. (3-0) 3 Credit Hours.
Prerequisite: CS 5233 or CS 5633. This course studies machine learning techniques in the area of artificial intelligence. Topics include inductive learning, unsupervised learning, speedup learning, and computational learning theory. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 6253. Parallel Algorithms. (3-0) 3 Credit Hours.
Study of various design techniques and representative algorithms on shared memory and network models of parallel computation, and possibly, a few emerging topics in distributed and network computing arena. Topics may include algorithms for sorting, searching, selection, trees, graphs, data structures, etc., and new and emerging models and applications. Differential Tuition: $150. Course Fees: GS01 $90.

CS 6263. Natural Language Processing. (3-0) 3 Credit Hours.
Prerequisite: CS 5233 or consent of the instructor. This course covers the basic concepts and algorithms in natural language processing, including but not limited to string algorithms, language models, and machine learning for text classification and machine translation. Differential Tuition: $150. Course Fees: GS01 $90.

CS 6273. Parallel Algorithms. (3-0) 3 Credit Hours.
Prerequisite: CS 3343. Study of various design techniques and representative algorithms on shared memory and network models of parallel computation, and possibly, a few emerging topics in distributed and network computing arena. Topics may include algorithms for sorting, searching, selection, trees, graphs, data structures, etc., and new and emerging models and applications. Differential Tuition: $150. Course Fees: GS01 $90.

CS 6323. Cybersecurity Models and Systems. (3-0) 3 Credit Hours.
Prerequisites: CS 5323 or permission of instructor. Advanced coverage of core cybersecurity and privacy principles, models and technologies, and their applications in designing and building practical scalable systems. Emphasis on recently deployed and emerging cyber technologies and applications. Differential Tuition: $150. Course Fees: GS01 $90.

CS 6333. Cybersecurity Data Analytics. (3-0) 3 Credit Hours.
Prerequisite: CS 4373. Study on analyzing cybersecurity data to extract useful cybersecurity intelligence and information. Topics may include intrusion detection methods, anomaly detection methods, adversarial machine learning, malware detection methods, adversarial malware detection methods, and time series methods. Emphasis is on explaining cybersecurity meanings of phenomena and properties exhibited by cybersecurity data. Differential Tuition: $150. Course Fees: GS01 $90.
CS 6343. Cyber Risk Management. (3-0) 3 Credit Hours.
Prerequisite: CS 5323. Real-world cyber defenders and chief information/cybersecurity officers often need to make decisions in both operations and investments. This course aims to prepare next generation cyber defenders and chief information/cybersecurity officers with the way-of-thinking in coping with cyber risks and the state-of-the-art in cyber risk management and decision-making. This course aims to prepare students with the body of knowledge that is needed for accomplishing such tasks and understanding and managing cyber risks. The course systematically describes the various kinds of cyber risks, strategies for mitigating these cyber risks, methodologies for qualitative and quantitative cyber risk management, and principles and approaches for making cost-effective (if not optimal) decisions. Differential Tuition: $150. Course Fees: GS01 $90.

CS 6353. Unix and Network Security. (3-0) 3 Credit Hours.
Prerequisite: CS 5323. A technical survey of the fundamentals of computer and information security as it relates to networks and the UNIX operating system. Issues include authentication, common and advanced attack techniques for both the OS and networks, defensive strategies, intrusion detection, scan techniques and detection, forensics, denial of service techniques and defenses, libpcap, libdnet and libnet programming. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 6373. Applied Cryptography. (3-0) 3 Credit Hours.
Prerequisite: CS 5323. A course in applied cryptography with an emphasis on applying cryptographic techniques to solve real-world problems. Topics include a review of cryptographic primitives such as symmetric and asymmetric (public-key) cryptosystems, digital signatures, pseudo-random sequences, and hash functions. An emphasis will be placed on utilizing advanced protocols to solve problems such as key management in various environments and applications. Differential Tuition: $150. Course Fees: GS01 $90.

CS 6393. Advanced Topics in Computer Security. (3-0) 3 Credit Hours.
Prerequisite: CS 5323. Analysis of computer security. The topics may include but are not limited to database and distributed systems security, formal models for computer security, privacy and ethics, intrusion detection, critical infrastructure protection, network vulnerability assessments, wireless security, trusted computing, and highly dependable systems. May be repeated for credit when topics vary. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 6463. Advanced Topics in Computer Science. (3-0) 3 Credit Hours.
Prerequisites: Graduate standing in Computer Science and consent of instructor. Advanced topics in an area of computer science. May be repeated for credit when topics vary. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 6513. Advanced Architecture. (3-0) 3 Credit Hours.
Prerequisites: CS 5513 and CS 5523. Areas of study include advanced architectures, including massively parallel and distributed systems. Issues of communication, fault tolerance, and performance are addressed. Differential Tuition: $150. Course Fees: GS01 $90.

CS 6543. Networks. (3-0) 3 Credit Hours.
Prerequisite: CS 5523. This course introduces the underlying concepts and principles of modern computer networks, with emphasis on protocols, architectures and implementation issues in the internet. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 6553. Performance Evaluation. (3-0) 3 Credit Hours.
Prerequisites: CS 5513 and CS 5523. This course introduces analytical modeling, simulation analysis, and experimental evaluation of computer systems and networks. Particular emphasis will be placed on the analysis and design of medium- to large-scale distributed computer systems and networks. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 6643. Parallel Processing. (3-0) 3 Credit Hours.
Prerequisite: CS 5513. Parallel models of computation, performance measurement, and modeling of parallel algorithms and application studies on parallel computers. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 6663. Advanced Parallel Processing and Systems. (3-0) 3 Credit Hours.
Prerequisites: CS 5513 and CS 5523. An advanced parallel computing course focusing on large-scale data processing. Topics may include parallel processing with non-CPU processors (such as GPUs, FPGAs, Application-specific Circuits), large-scale Non-Uniform Memory Access architectures, parallel data-processing frameworks, non-volatile memory chips and large-scale public clouds. Differential Tuition: $150. Course Fees: GS01 $90.

CS 6723. Image Processing. (3-0) 3 Credit Hours.
Prerequisites: CS 3343 and MAT 2233 or an equivalent. Topics include image acquisition, image transformations, filters, enhancement and restoration, compression, segmentation and edge detection, morphology, and recognition. Differential Tuition: $150. Course Fees: GS01 $90.

CS 6953. Independent Study. (0-0) 3 Credit Hours.
Prerequisite: Approval of the Graduate Program Committee to take the Comprehensive Examination. Independent study course for the purpose of taking the Comprehensive Examination. May be repeated as many times as approved by the Graduate Program Committee. Enrollment is required each term in which the Comprehensive Examination is taken if no other courses are being taken that term. The grade report for the course is either “CR” (satisfactory performance on the Comprehensive Examination) or “NC” (unsatisfactory performance on the Comprehensive Examination). Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 6961. Comprehensive Examination. (0-0) 1 Credit Hour.
Prerequisite: Approval of the Graduate Program Committee to take the Comprehensive Examination. Independent study course for the purpose of taking the Comprehensive Examination. May be repeated as many times as approved by the Graduate Program Committee. Enrollment is required each term in which the Comprehensive Examination is taken if no other courses are being taken that term. The grade report for the course is either “CR” (satisfactory performance on the Comprehensive Examination) or “NC” (unsatisfactory performance on the Comprehensive Examination). Differential Tuition: $50. Course Fees: GS01 $90; IUCS $45.

CS 6981. Master's Thesis. (0-0) 1 Credit Hour.
Prerequisite: Consent of thesis advisor. Thesis research and preparation. May be repeated for credit, but not more than 6 hours will apply to the Master's degree. Credit will be awarded upon completion of the thesis. Enrollment is required each term in which the thesis is in progress. Course Fees: GS01 $30; LRS1 $5; STSI $5.

CS 6983. Master's Thesis. (0-0) 3 Credit Hours.
Prerequisite: Consent of thesis advisor. Thesis research and preparation. May be repeated for credit, but not more than 6 hours will apply to the Master's degree. Credit will be awarded upon completion of the thesis. Enrollment is required each term in which the thesis is in progress. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.
CS 7123. Research Methods. (3-0) 3 Credit Hours.
Prerequisites: Doctoral Student standing. Examine and learn practical research skills and research writing techniques. Review, present, and critique recent research publications in the areas of Computer Science. May be repeated for credit. May not be counted towards the Master of Science degree in Computer Science. Differential Tuition: $150. Course Fees: GS01 $90.

CS 7211. Doctoral Research. (0-0) 1 Credit Hour.
Prerequisite: Doctoral Student standing and consent of Doctoral Advisor. May be repeated, a minimum of 18 hours is required for the Doctoral degree. Differential Tuition: $50. Course Fees: GS01 $30; IUCS $15.

CS 7212. Doctoral Research. (0-0) 2 Credit Hours.
Prerequisite: Doctoral Student standing and consent of Doctoral Advisor. May be repeated, a minimum of 18 hours is required for the Doctoral degree. Differential Tuition: $100. Course Fees: GS01 $60; IUCS $30.

CS 7213. Doctoral Research. (0-0) 3 Credit Hours.
Prerequisite: Doctoral Student standing and consent of Doctoral Advisor. May be repeated, a minimum of 18 hours is required for the Doctoral degree. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 7216. Doctoral Research. (0-0) 6 Credit Hours.
Prerequisite: Successful completion of the Doctoral Qualifying Examination. May be repeated, a minimum of 18 hours is required for the Doctoral degree. Differential Tuition: $300 Course Fees: GS01 $180; IUCS $90.

CS 7311. Doctoral Dissertation. (0-0) 1 Credit Hour.
Prerequisite: Admission to candidacy for the Doctoral degree. May be repeated, a minimum of 9 hours is required for the Doctoral degree. Differential Tuition: $50. Course Fees: GS01 $30; IUCS $15.

CS 7312. Doctoral Dissertation. (0-0) 2 Credit Hours.
Prerequisite: Admission to candidacy for the Doctoral degree. May be repeated, a minimum of 9 hours is required for the Doctoral degree. Differential Tuition: $100. Course Fees: GS01 $60; IUCS $30.

CS 7313. Doctoral Dissertation. (0-0) 3 Credit Hours.
Prerequisite: Admission to candidacy for the Doctoral degree. May be repeated, a minimum of 9 hours is required for the Doctoral degree. Differential Tuition: $150. Course Fees: GS01 $90; IUCS $45.

CS 7316. Doctoral Dissertation. (0-0) 6 Credit Hours.
Prerequisite: Admission to candidacy for the Doctoral degree. May be repeated, a minimum of 9 hours is required for the Doctoral degree. Differential Tuition: $300. Course Fees: GS01 $180; IUCS $90.
