7. COLLEGE FOR HEALTH, COMMUNITY AND POLICY

Mission Statement
The College for Health, Community and Policy is a new innovative college dedicated to advancing human health. The College will transform the way UTSA prepares students for the modern setting of human health related careers, in which physician scientists, nurses, therapists, technicians, social workers, social service and public service workers, and policymakers work together to deliver comprehensive solutions that advance local Texas communities.

General Information
The College for Health, Community and Policy offers nine undergraduate degrees, nine minors, and four certificates. The Bachelor of Science degree in Nutrition and Dietetics, the Community Health Worker certificate, and the Nutrition for Health Professionals certificate are housed under the College for Health, Community and Policy. The Department of Criminology and Criminal Justice offers the Bachelor of Arts degree in Criminology and Criminal Justice and a Minor in Criminology and Criminal Justice. The Department of Kinesiology houses the Bachelor of Science (B.S.) degree in Kinesiology, with concentrations in athletic training, exercise physiology, kinesiology and health science, and physical education, and a certificate in Athletic Coaching. The Department of Psychology offers a Bachelor of Arts degree in Psychology and a Minor in Psychology. The Department of Public Administration offers a Bachelor of Arts degree in Public Administration and Policy, a Minor in Civic Engagement, a Minor in Public Administration and Policy, a Minor in Nonprofit Management, and a certificate in Public Policy and Data Analysis. The Department of Public Health houses the Bachelor of Science degree in Public Health, with concentrations in health services and health promotion, a Minor in Community Health, and a Minor in Wellness. The Department of Social Work offers a Bachelor of Social Work degree. The Department of Sociology and Demography offers a Bachelor of Arts degree in Sociology, a Bachelor of Science degree in Health, Aging and Society, a Minor in Sociology, and a Minor in Health, Aging and Society.

Coordinated Program in Dietetics

Bachelor of Science Degree in Nutrition and Dietetics

The Bachelor of Science (B.S.) in Nutrition and Dietetics is part of the Coordinated Program in Dietetics (CPD), which is a three-year integrated degree that includes the Master of Dietetic Studies (MDS) with 1000 hours of supervised practice. The B.S. in Nutrition and Dietetics requires two years of junior and senior level coursework, while the third year offers masters level courses. Students admitted into the undergraduate program are not guaranteed placement into the MDS unless they maintain a 3.0 grade point average, have completed all support courses, degree core, and Texas core with a grade of "C-" or better, and met all program requirements. Upon successful completion of the three-year professional program, students will receive a verification statement that certifies their eligibility to take the Commission on Dietetics Registration national examination to become a Registered Dietitian Nutritionist (RDN/RD).

Students enrolled in the Dietetics Program who are not eligible to transition to the Master of Dietetics Studies may earn the Bachelor of Science degree in Nutrition and Dietetics if they meet the program and University graduation requirements but are not eligible for the verification statement to take the national RDN/RD exam.

Academic advising for students seeking the degree is available in the Life and Health Sciences Advising Center.

The minimum number of semester credit hours for this degree, including the Core Curriculum requirements, is 120, at least 39 of which must be at the upper-division level. All candidates seeking this degree must fulfill the Core Curriculum requirements and the degree requirements, which are listed below.

Admission Policy
Admission to the Coordinated Program in Dietetics is competitive. The program has been approved for a limited number of students by the accrediting organization. Admission into the major as part of a cohort group occurs in the Fall semester.

The requirements for admission into the Nutrition and Dietetics degree are intended to offer a program with high standards for success. Some of the requirements are known to be good predictors of achievement in the graduate professional phase of the Coordinated Program in Dietetics. Students interested in Nutrition and Dietetics will not be admitted directly into the major because this major cannot be declared as a freshman. Students interested in Nutrition and Dietetics must meet UTSA’s general admission requirements and will be admitted into the “Life and Health Science Studies” until all requirements can be met at UTSA.

To declare a major in Nutrition and Dietetics, the following minimum criteria must be met:

- Must complete all support courses and most of the Texas Core requirements with a minimum cumulative grade point average (GPA) of 3.0 (on a 4.0 scale) and be in good standing with the University.
- Must complete all prerequisite courses with a grade of "C-" or better. Detailed information about the courses, including the Texas Common Course Numbers may be obtained from the Undergraduate Catalog.
- Must complete NDT 2043 Introduction to Nutritional Sciences or equivalent course with a grade of "B-" or better.
- May not repeat a prerequisite course more than twice to meet the grade criterion.
- Must complete all support courses (prerequisite courses) by the end of the Summer semester prior to entering the program in the Fall semester.
- Must submit a program application, transcripts (unofficial), two completed reference forms (program specific, preferably by faculty members), a résumé, volunteer summary, and a statement indicating personal career goals, knowledge of the profession, commitment, interests, and motivation.
- Must have a personal interview with the program review committee members (by invitation) and receive a decision letter indicating acceptance.
- Must obtain a criminal background check.

Transfer students must meet all the above criteria and meet all the UTSA undergraduate admission requirements. Students who hold a
Bachelor in Dietetics or Nutrition related field must have a verification statement (or an equivalent baccalaureate degree in nutrition and dietetics from an accredited college or university in the United States or have proof of equivalent training at a foreign institution) and will be expected to complete select undergraduate courses/practicums to meet the program’s requirements. Admission is contingent on accreditation requirements and the number of placements available for the advanced practicums. Students who hold a bachelor’s degree in an unrelated field would be required to complete all prerequisite courses and all equivalent undergraduate courses/practicums in dietetics and nutrition. Official transcripts from all institutions attended must be submitted.

Criminal Record Check
A criminal background check is required for admission and during the semesters in which a student enrolls in field-based practicums. Students will be required to complete a Criminal Record Check for practicums associated with schools, healthcare facilities, community organizations, hospitals, and clinics. It is the responsibility of the student to determine if their criminal history background will present a problem before applying for admission to the program. Students with problematic criminal history will not be able to complete most of the field experiences that are required by the program.

Core Curriculum Requirements (42 semester credit hours)
Students seeking the B.S. degree in Nutrition and Dietetics must fulfill University Core Curriculum requirements in the same manner as other students. The courses listed below satisfy both degree requirements and Core Curriculum requirements. If courses are taken to satisfy both degree requirements and Core Curriculum requirements, then students may need to take additional courses in order to meet the minimum number of semester credit hours required for this degree.

MAT 1073 should be used to satisfy the core requirement in Mathematics. BIO 1233 or BIO 1203 should be used to satisfy one of the Life and Physical Sciences requirements, and BIO 1243 or BIO 1223 should be used to satisfy the other Life and Physical Sciences requirement. ANT 1013 or SOC 1013 or PSY 1013 should be used to satisfy the Social and Behavioral Sciences requirement. STA 1053 may be used to satisfy the Component Area Option.

**Gateway Course**
Students pursuing the Bachelor of Science degree in Nutrition and Dietetics must successfully complete the following Gateway Course with a grade of “C-” or better in no more than two attempts. A student who is unable to successfully complete this course within two attempts, including dropping the course with a grade of “W” or taking an equivalent course at another institution, will be required to change their major.

The practicum courses involve traveling off campus to affiliation sites. Check the University Schedule of Classes or with the instructor to plan the rest of the course schedule accordingly.

Course Sequence Guide for B.S. Degree in Nutrition and Dietetics

This course sequence guide is designed to assist students in completing their UTSA undergraduate degree requirements that are part of the Coordinated Program in Dietetics. This is merely a guide, and students must satisfy other admission requirements for the Coordinated Program in Dietetics, as well as meet with their advisor for individualized degree plans. Progress within this guide depends upon such factors as course availability, individual student academic preparation, student time management, work obligations, and individual financial considerations.

Students may choose to take core and support courses during Summer terms to reduce course loads during long semesters. Courses in the Nutrition and Dietetics Program are only offered once a year, according to the guide below.

Bachelor of Science Degree in Nutrition and Health

The Bachelor of Science (B.S.) degree in Nutrition and Health is a 120-credit-hour degree designed to prepare students for entry-level positions in public health nutrition at state health departments, schools, community organizations, non-profits, and the food industry. The degree is suited for students taking prerequisites for medical schools or graduate programs in nutrition, public health, allied health, and biomedical sciences. Students who are interested in applying to health profession programs are encouraged to meet with their academic advisor and consult with the UTSA Health Professions Office.

Courses in this program help students understand and implement health promotion and disease prevention, promote healthy lifestyles through nutritional and behavioral changes, and effectively communicate nutrition messages to individuals and the public. This program is **NOT** accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) and does not meet the requirements for students to become registered dietitian nutritionists (RDNs). However, students are encouraged to declare the B.S. in Nutrition and Health major while completing the prerequisite courses to apply for UTSA’s Coordinated Program in Dietetics.

Students may apply for admission into one of the concentrations within the B.S. degree in Nutrition and Health if they wish to specialize in Maternal and Child Health & Nutrition (MCHN) or Sustainable Nutrition & Food Systems (SNFS). Students may also pursue the major without a concentration.

The minimum number of semester credit hours for this degree, including the Core Curriculum requirements, is 120, of which at least 39 must be at the upper-division level. All candidates seeking this degree must fulfill the Core Curriculum requirements and the degree requirements. All required Nutrition (NTR) and Nutrition and Dietetic (NDT) courses must be completed with a grade of “C-” or better.

B.S in Nutrition and Health with Maternal and Child Health & Nutrition (MCHN) or Sustainable Nutrition & Food Systems (SNFS) Concentration

The concentrations in MCHN or SNFS can prepare students for jobs in extension service, health and wellness non-profits, school nutrition programs, public health/government nutrition programs such as the Special Supplemental Nutrition Program for Women, Infants, and Children, food service management, and food agriculture and industry. After graduation, students are prepared to pursue courses and programs to become certified as lactation consultants or dietary managers. Only one concentration can be declared.

**Concentration Admission Policy**

The goal of admission requirements for one of the B.S. in Nutrition and Health concentrations is to provide undergraduate students with a program of study with the highest possible standards. To achieve this goal, the admission policy is designed to identify those students most likely to succeed in Maternal and Child Health & Nutrition (MCHN) or Sustainable Nutrition & Food Systems (SNFS).

All applicants for admission to a concentration will be initially admitted to the Nutrition and Health program without a concentration. For a student to declare a concentration, they must meet the following academic criteria:

- Completion of 30 hours of prerequisite and/or support courses with a grade of “C-” or better.
- Have a minimum 2.75 (on a 4.0 scale) cumulative (all completed coursework) GPA.

**Core Curriculum Requirements (42 semester credit hours)**

Students seeking the B.S. degree in Nutrition and Health must fulfill University Core Curriculum requirements in the same manner as other students. The courses listed below satisfy both degree requirements and Core Curriculum requirements. If courses are taken to satisfy both degree requirements and Core Curriculum requirements, then students may need to take additional courses in order to meet the minimum number of semester credit hours required for this degree.

MAT 1073 should be used to satisfy the core requirement in Mathematics. BIO 1233 or BIO 1203 should be used to satisfy one of the Life and Physical Sciences requirements, and BIO 1243 or BIO 1223 should be used to satisfy the other Life and Physical Sciences requirement. ANT 1013, SOC 1013, or PSY 1013 should be used to satisfy the Social and Behavioral Sciences requirement. STA 1053 may be used to satisfy the Component Area Option.

**Core Curriculum Component Area Requirements**

Students seeking the B.S. degree in Nutrition and Health must fulfill University Core Curriculum requirements in the same manner as other students. The courses listed below satisfy both degree requirements and Core Curriculum requirements. If courses are taken to satisfy both degree requirements and Core Curriculum requirements, then students may need to take additional courses in order to meet the minimum number of semester credit hours required for this degree.

**Core Curriculum Component Area Requirements**

Students seeking the B.S. degree in Nutrition and Health must fulfill University Core Curriculum requirements in the same manner as other students. The courses listed below satisfy both degree requirements and Core Curriculum requirements. If courses are taken to satisfy both degree requirements and Core Curriculum requirements, then students may need to take additional courses in order to meet the minimum number of semester credit hours required for this degree.

- Nutrition for Health Professionals Certificate (p. 6)
- Community Health Worker Certificate (p. 6)

**Nutrition for Health Professionals Certificate**

The Nutrition for Health Professionals Certificate covers nutrition among all stages of life, as it relates to prevention, management, and treatment strategies to promote optimal health. Nutrition education and communication strategies will be a central focus. Courses are taught by Registered, Licensed Dietitians.

The certificate program is open to all majors. Courses can be taken toward certificate completion or as stand-alone electives.

**Community Health Worker Certificate**

This certificate is designed to provide community health worker training to community members as a stackable certificate that could be applied with the addition of one or more focus areas to qualify for a Multidisciplinary Studies (MDST) bachelor's degree. Community health worker training is designed to help members of the community to provide health-related information to their fellow community members. This information can be disease-specific, treatment-related, or even facilitating access to care and insurance.
HCP 1400. Signature Experience – Study Away. (0-0) 0 Credit Hours. An international or other “away” form UTSA experiential opportunity that allows students to obtain valuable knowledge and skill building to include culturally diverse experiences. Includes a monitored self-reflection component. May be repeated.

HCP 1500. Signature Experience – Community Engagement. (0-0) 0 Credit Hours. An experiential and meaningful community-based learning opportunity to enrich the learning experience, develop skills of civic engagement/social responsibility. Supervision by faculty member or community partner. Includes a monitored self-reflection component. May be repeated.

HCP 4100. Signature Experience – Leadership. (0-0) 0 Credit Hours. A semester-long opportunity for skill building and application such as self, social, and situational awareness. Students will identify and further develop a personal foundation of knowledge, skills and attitudes related to leadership under the supervision if a faculty member or mentor. Includes a monitored self-reflection component. May be repeated.

HCP 4200. Signature Experience – Internship. (0-0) 0 Credit Hours. An experiential learning internship opportunity in which students conduct supervised professional activities in an organization closely related to their field of study. Includes a monitored self-reflection component. May be repeated.

HCP 4300. Signature Experience – Research. (0-0) 0 Credit Hours. Supervised research mentored by a faculty member or other supervisor engaged in active research in the student’s field of study. Includes skill building and application such as asking questions, proposing hypotheses, designing studies, selecting methods, using the tools of science, gathering and analyzing data, discovery, investigating and communicating findings. Includes a monitored self-reflection component. May be repeated.

HCP 4400. Signature Experience – Study Away. (0-0) 0 Credit Hours. An international or other “away” form UTSA experiential opportunity that allows students to obtain valuable knowledge and skill building to include culturally diverse experiences. Includes a monitored self-reflection component. May be repeated.

HCP 4500. Signature Experience – Community Engagement. (0-0) 0 Credit Hours. An experiential and meaningful community-based learning opportunity to enrich the learning experience, develop skills of civic engagement/social responsibility. Supervision by faculty member or community partner. Includes a monitored self-reflection component. May be repeated.

### Nutrition (NTR) Courses

NTR 2013. Introduction to Public Health Nutrition. (3-0) 3 Credit Hours. Prerequisite: NDT 2043 or equivalent. Introduces students to the principles of nutrition and public health. Considers the multiple levels of influence on diet intake, food choice, and related health outcomes. Examines nutrition prevention policy, programs, initiatives, and interventions. The course will also cover the role of the public health nutrition professional in the community. (Formerly NDT 2313.) Course Fee: LRHC $10; STHC $18.

NTR 3012. Food Science Lab and Experimental Activities. (0-6) 2 Credit Hours. Prerequisite: NDT 2043 or equivalent. Learn the basic principles of food science and gain an enhanced understanding of the role of food science in the development of food products. Gain a better understanding of the importance of food safety, basic regulatory issues, and food science trends. Course Fee: LRHC $10; STHC $12; DNMF $450.

---

### Health, Community and Policy (HCP) Courses

#### HCP 1100. Signature Experience – Leadership. (0-0) 0 Credit Hours.
A semester-long opportunity for skill building and application such as self, social, and situational awareness. Students will identify and further develop a personal foundation of knowledge, skills and attitudes related to leadership under the supervision if a faculty member or mentor. Includes a monitored self-reflection component. May be repeated.

#### HCP 1200. Signature Experience – Internship. (0-0) 0 Credit Hours.
An experiential learning internship opportunity in which students conduct supervised professional activities in an organization closely related to their field of study. Includes a monitored self-reflection component. May be repeated.

#### HCP 1300. Signature Experience – Research. (0-0) 0 Credit Hours.
Supervised research mentored by a faculty member or other supervisor engaged in active research in the student’s field of study. Includes skill building and application such as asking questions, proposing hypotheses, designing studies, selecting methods, using the tools of science, gathering and analyzing data, discovery, investigating and communicating findings. Includes a monitored self-reflection component. May be repeated.

#### B. Electives

Students will select 3 hours from the following courses:

### Health, Community and Policy (HCP) Courses

#### HCP 4100. Signature Experience – Leadership. (0-0) 0 Credit Hours.
A semester-long opportunity for skill building and application such as self, social, and situational awareness. Students will identify and further develop a personal foundation of knowledge, skills and attitudes related to leadership under the supervision if a faculty member or mentor. Includes a monitored self-reflection component. May be repeated.

#### HCP 4200. Signature Experience – Internship. (0-0) 0 Credit Hours.
An experiential learning internship opportunity in which students conduct supervised professional activities in an organization closely related to their field of study. Includes a monitored self-reflection component. May be repeated.

#### HCP 4300. Signature Experience – Research. (0-0) 0 Credit Hours.
Supervised research mentored by a faculty member or other supervisor engaged in active research in the student’s field of study. Includes skill building and application such as asking questions, proposing hypotheses, designing studies, selecting methods, using the tools of science, gathering and analyzing data, discovery, investigating and communicating findings. Includes a monitored self-reflection component. May be repeated.

#### HCP 4400. Signature Experience – Study Away. (0-0) 0 Credit Hours.
An international or other “away” form UTSA experiential opportunity that allows students to obtain valuable knowledge and skill building to include culturally diverse experiences. Includes a monitored self-reflection component. May be repeated.

#### HCP 4500. Signature Experience – Community Engagement. (0-0) 0 Credit Hours.
An experiential and meaningful community-based learning opportunity to enrich the learning experience, develop skills of civic engagement/social responsibility. Supervision by faculty member or community partner. Includes a monitored self-reflection component. May be repeated.

---

### Nutrition (NTR) Courses

#### NTR 2013. Introduction to Public Health Nutrition. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. Introduces students to the principles of nutrition and public health. Considers the multiple levels of influence on diet intake, food choice, and related health outcomes. Examines nutrition prevention policy, programs, initiatives, and interventions. The course will also cover the role of the public health nutrition professional in the community. (Formerly NDT 2313.) Course Fee: LRHC $10; STHC $18.

#### NTR 3012. Food Science Lab and Experimental Activities. (0-6) 2 Credit Hours.
Prerequisite: NDT 2043 or equivalent. Learn the basic principles of food science and gain an enhanced understanding of the role of food science in the development of food products. Gain a better understanding of the importance of food safety, basic regulatory issues, and food science trends. Course Fee: LRHC $10; STHC $12; DNMF $450.
NTR 3023. Fundamentals of Food Science and Safety. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. Theory and practical application of scientific principles of food purchasing and preparation, including food safety considerations, and regulatory agencies responsible for food safety. Course Fee: LRHC $10; STHC $18.

NTR 3043. Nutrition Education and Communication for Health Professionals. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. Introduces students to the fundamentals of nutrition education, including traditional and developing models and theories of learning for promoting good nutrition and health. Students will develop a basic understanding of consumer trends in food, nutrition, and health and effective communication skills to promote a healthy lifestyle. (Formerly NDT 3363.) Course Fee: LRHC $10; STHC $18.

NTR 3053. Foundations of Maternal and Child Health and Nutrition. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. This course is an introduction to the historical perspective of maternal and child health, emphasizing nutritional recommendations during preconception, pregnancy, lactation, early infancy, and childhood. Students will gain an understanding of the federal programs that support women, infants, and children and explore career opportunities. (Formerly NDT 3373.) Course Fee: LRHC $10; STHC $18.

NTR 3073. Nutrition Matters: Food Systems from Farm to Fork. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. Students will gain a scientific foundation for understanding what we eat matters, farm to fork, and the tools and skills to make the healthy food choices to promote good health and prevent chronic disease. (Formerly NDT 2323.) Course Fee: LRHC $10; STHC $18.

NTR 4013. Public Health Nutrition Program Management and Leadership. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. This course focuses on enhancing an individual’s abilities to become a skilled professional and a leader in the field of human nutrition. Qualities of leaders, efficient teams, effective communication, and transformational leadership will be applied in a wider perspective pertaining to public health nutrition programs. Course Fee: LRHC $10; STHC $18.

NTR 4023. Public Health Nutrition Policy Systems and Solutions. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. Familiarize and engage in the dynamics of policy making processes that address nutrition problems and issues. This course will discuss governmental and legislative decisions that address a nutrition or food problem or set of problems. Course Fee: LRHC $10; STHC $18.

NTR 4033. Personal Nutrition and Cooking Basics. (2-3) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. This course is designed to evaluate social determinants of food choices and the meaning of food in the context of various cultures, as they contribute to the establishment of a cultural identity through the acquisition of basic food preparation skills. Course Fee: LRHC $10; STHC $18; DNMF $675.

NTR 4043. Nutrition, Chronic Disease and Health Behavior. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. This course is a survey of current nutrition science principles in disease prevention and health promotion. As a result of taking this course, you will gain nutritional science knowledge and analytical skills that can be used to evaluate primary research related to nutrition and specific disease states. Course Fee: LRHC $10; STHC $18.

NTR 4053. Nutrition and Healthy Aging. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. This course reviews aging theories and the pathophysiology of aging while focusing on the nutritional needs of older adults. Nutritional status assessment and management of age-related diseases will be explored. Course Fee: LRHC $10; STHC $18.

NTR 4063. Nutrition for Pregnancy and Lactation. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. Overview of nutrition issues affecting pregnant and postpartum women, females of reproductive age, infants, and toddlers through two years of age. The course will integrate public health practice and policy recommendations with evidence-based clinical practice guidelines to provide a comprehensive view of maternal and infant nutrition issues from a public health perspective. Course Fee: LRHC $10; STHC $18.

NTR 4073. Pediatric and Adolescent Nutrition. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. Overview of nutritional needs of preschool-aged children in early childhood through adolescence. Relevant conditions, such as food allergies, obesity, and eating disorders, will be discussed as well as the influence of parents, schools, media, and the community will be examined. Course Fee: LRHC $10; STHC $18.

NTR 4083. Introduction to Translational Research Methods In Nutrition Research. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. This course discusses the implication of translational research in the nutrition field. Students will be able to select appropriate methods of data collection and analysis for given nutrition-related problems. Critical evaluation of research and ethics in research will be required. Course Fee: LRHC $10; STHC $18.

NTR 4093. Personal Nutrition for Sport Performance and Health. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. Increase student understanding of advanced concepts of human nutrition, including digestion, absorption, metabolism, and the function of nutrients as they relate to human health and physical performance while developing an understanding of nutritional genomics in relation to personalized nutrition as means of nutritional control of gene expression and functional genomic studies with relationships to nutrient intake and polymorphisms. Course Fee: LRHC $10; STHC $18.

NTR 4933. Internship in Public Health Nutrition. (3-0) 3 Credit Hours.
Prerequisite: A cumulative grade point average of 3.00 or greater and must be within 9 semester credit hours of graduation is required; and NDT 2043. The internship provides an opportunity to gain experience in a public health nutrition-related agency. Opportunities will be coordinated with a faculty advisor. Course Fee: LRHC $10; STHC $18; DNPF $60.

Nutrition and Dietetics (NDT) Courses

NDT 2043. Introduction to Nutritional Sciences. (3-0) 3 Credit Hours.
Prerequisite: BIO 1233 or BIO 1203. Basic concepts related to the classification and functions of nutrients; the process of digestion, absorption, transport, utilization, and storage of nutrients in humans and the interaction between diet and health. May be applied toward the Core Curriculum requirement in Life and Physical Sciences. Generally offered: Fall, Spring, Summer. Course Fee: DL01 $75; LRHC $10; STHC $18.

NDT 3191. Applied Food Science Practicum. (0-3) 1 Credit Hour.
Prerequisite: Dietetics majors only, MMI 1053, CHE 1103, CHE 1113, and NDT 2043 or equivalent; completion of or concurrent enrollment in NDT 3313 or permission of faculty advisor. The application of concepts related to the chemical, physical, sensory, and nutritional properties of food in menu planning, food preparation, and recipe modification. Generally offered: Fall. Course Fee: DNMF $225; LRHC $10; STHC $6; DL01 $25.
NDT 3203. Introduction to Nutrition and Dietetics Careers. (3-0) 3 Credit Hours.
Prerequisite: Dietetics majors only. General overview of nutrition and dietetics as a profession, including career opportunities, scope of practice, credentialing, code of ethics, and collaboration with other disciplines. Self-directed modules on medical terminology, word roots, prefixes and suffixes will be integrated into the course content. Generally offered: Fall. Course Fee: DL01 $75; LRHC $10; STHC $18.

NDT 3292. Food Production Practicum. (0-6) 2 Credit Hours.
Prerequisite: Dietetics majors only; completion of or concurrent enrollment in NDT 3353 or permission of faculty advisor. Practicum related to the procurement, preparation, and delivery of food in large foodservice operations. Generally offered: Spring. Course Fee: DNPF $40; LRHC $10; STHC $18.

NDT 3313. Applied Food Science. (3-0) 3 Credit Hours.
Prerequisite: Dietetic majors only, MMI 1053, CHE 1103, CHE 1113, and NDT 2043 or equivalent; concurrent enrollment in NDT 3191 is recommended. Concepts related to the chemical, physical, sensory, and nutritional properties of food in menu planning, food preparation, and recipe modification. Generally offered: Fall. Course Fee: LRHC $10; STHC $18; DL01 $75.

NDT 3323. Nutrition and Health Assessment. (3-0) 3 Credit Hours.
Prerequisite: Dietetics majors only, NDT 2043 or equivalent. Methods, tools, and interpretation of data in assessing the nutritional status of individuals including dietary, anthropometric, biochemical, and clinical assessment, as well as other measurements of health in individuals and the community. Generally offered: Spring. Course Fee: LRHC $10; STHC $18.

NDT 3333. Nutrition Counseling and Education. (3-0) 3 Credit Hours.
Prerequisite: Dietetics majors only, NDT 2043 or equivalent. Discussion of theories of learning and behavior modification, models and techniques, communication skills, evaluation methods, and cultural competence in nutrition counseling and education; and application of concepts to facilitate behavioral change. Generally offered: Spring. Course Fee: LRHC $10; STHC $18.

NDT 3343. Nutrition in the Life Span. (3-0) 3 Credit Hours.
Prerequisite: NDT 3043 or equivalent (required) and Human Physiology (recommended). Nutritional needs during various stages of the lifecycle as influenced by physiologic, cultural, and environmental factors. Course Fee: LRHC $10; STHC $18; DL01 $75.

NDT 3353. Production and Foodservice System Management I. (3-0) 3 Credit Hours.
Prerequisite: NDT 3313 or NTR 3023, or equivalent; concurrent enrollment in NDT 3292 is recommended for dietetics majors. Principles related to the menu planning, food sanitation and safety, procurement, production, marketing, and materials management in foodservice operations. Generally offered: Spring. Course Fee: LRHC $10; STHC $18.

NDT 3413. Advanced Human Nutrition. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent and BCH 2903 or equivalent. Advanced discussion of nutrient structure, function and interaction, metabolic pathways, and regulation and integration of metabolism. Course Fee: LRHC $10; STHC $18; DL01 $75.

NDT 4091. Community Nutrition Practicum. (0-3) 1 Credit Hour.
Prerequisite: Permission of course instructor. Application of learned strategies in meaningful community service through collaborative tasks performed at various community nutrition programs. Service learning activities are aimed at enriching the life experiences of students through civic responsibility and community outreach. NDT 4333 is recommended to be taken concurrently. Course Fee: DNPF $20; LRHC $10; STHC $6; DL01 $25.

NDT 4191. Nutrition Care Process Practicum. (0-3) 1 Credit Hour.
Prerequisite: Dietetics majors only; completion of or concurrent enrollment in NDT 4353. A problem-based approach to dietetics practice using case simulations and studies; application of basic nutritional assessment skills, nutritional diagnosis, intervention, and monitoring in different settings; practice skills in counseling and nutrition education. Course Fee: DNPF $20; LRHC $10; STHC $6.

NDT 4313. Production and Food Service System Management II. (3-0) 3 Credit Hours.
Prerequisite: NDT 3353, or NTR 3023, or equivalent; NDT 3292 or equivalent (dietetics majors only). Theories and principles related to the foodservice, systems management including leadership, decision-making, human resources, and financial management of operations. Course Fee: DL01 $75; LRHC $10; STHC $18.

NDT 4323. Medical Nutrition Therapy I. (3-0) 3 Credit Hours.
Prerequisite: Dietetics majors only, and NDT 3323 and NDT 3333 or equivalent. Pathophysiology and the application of the nutritional care process in the treatment of simple human diseases and conditions, part 1. Course Fee: LRHC $10; STHC $18.

NDT 4333. Community Nutrition. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent; consent of instructor. Nutrition-related issues in public health, various community resources, agencies, and programs involved in health promotion and disease prevention. Course Fee: LRHC $10; STHC $18; DL01 $75.

NDT 4343. Nutrition in Disease Prevention and Health Promotion. (3-0) 3 Credit Hours.
Prerequisite: NDT 2043 and NDT 4333; consent of instructor. An evidence-based analysis as it relates to diet/nutrition in the prevention of chronic diseases; and fundamental concepts in the promotion of health among individuals and groups. Course Fee: LRHC $10; STHC $18.

NDT 4353. Medical Nutrition Therapy II. (3-0) 3 Credit Hours.
Prerequisite: Dietetics majors only, and NDT 4323. Continuation of Advanced Medical Nutrition I; and review of the pathophysiology and the application of the nutritional care process in the treatment of more complex human disease and conditions. Course Fee: LRHC $10; STHC $18.

NDT 4363. Current Issues in Nutrition. (3-0) 3 Credit Hours.
Prerequisites: NDT 2043 or equivalent; must have senior or graduate standing. In-depth discussion and analysis of emerging trends, concepts, and controversies in nutritional sciences, including application of evidence-based principles in the discussion. Course Fees: LRHC $10; STHC $18; DL01 $75.
NDT 4911. Independent Study in Nutrition and Dietetics. (0-0) 1 Credit Hour.
Prerequisite: NDT 2043 or equivalent. An exploration of topics of interest to the student in Nutrition and Dietetics. Students work under the close supervision of a faculty member to conduct research, intense study, or a project related to the selected topic. May be repeated for credit, but not more than 6 semester credit hours, regardless of discipline, will apply to a bachelor's degree. (Formerly NDT 4951. Credit cannot be earned for both NDT 4951 and NDT 4911.) Course Fee: LRHC $10; STHC $6.

NDT 4912. Independent Study in Nutrition and Dietetics. (0-0) 2 Credit Hours.
Prerequisite: NDT 2043 or equivalent. An exploration of topics of interest to the student in Nutrition and Dietetics. Students work under the close supervision of a faculty member to conduct research, intense study, or a project related to the selected topic. May be repeated for credit, but not more than 6 semester credit hours, regardless of discipline, will apply to a bachelor's degree. (Formerly NDT 4952. Credit cannot be earned for both NDT 4952 and NDT 4912.) Course Fee: LRHC $10; STHC $12.

NDT 4913. Independent Study in Nutrition and Dietetics. (0-0) 3 Credit Hours.
Prerequisite: NDT 2043 or equivalent. An exploration of topics of interest to the student in Nutrition and Dietetics. Students work under the close supervision of a faculty member to conduct research, intense study, or a project related to the selected topic. May be repeated for credit, but not more than 6 semester credit hours, regardless of discipline, will apply to a bachelor's degree. (Formerly NDT 4953. Credit cannot be earned for both NDT 4953 and NDT 4913.) Course Fee: LRHC $10; STHC $18.

NDT 4921. Undergraduate Dietetics Practicum. (0-0) 1 Credit Hour.
Prerequisite: Dietetics majors only; successful completion of undergraduate dietetics knowledge core requirements; must be in good academic standing. Supervised practice in dietetics in different settings, including clinical simulations, acute and long-term care facilities, rehabilitation and outpatient clinics, community programs, food science, and food service operations. Includes weekly seminar. Course Fee: DNPF $20; LRHC $10; STHC $6.

NDT 4922. Undergraduate Dietetics Practicum. (0-0) 2 Credit Hours.
Prerequisite: Dietetics majors only; successful completion of undergraduate dietetics knowledge core requirements; must be in good academic standing. Supervised practice in dietetics in different settings, including clinical simulations, acute and long-term care facilities, rehabilitation and outpatient clinics, community programs, food science, and food service operations. Includes weekly seminar. Course Fee: DNPF $40; LRHC $10; STHC $12.

NDT 4923. Undergraduate Dietetics Practicum. (0-0) 3 Credit Hours.
Prerequisite: Dietetics majors only; successful completion of undergraduate dietetics knowledge core requirements; must be in good academic standing. Supervised practice in dietetics in different settings, including clinical simulations, acute and long-term care facilities, rehabilitation and outpatient clinics, community programs, food science, and food service operations. Includes weekly seminar. Course Fee: DNPF $60; LRHC $10; STHC $18.

NDT 4925. Undergraduate Dietetics Practicum. (0-0) 5 Credit Hours.
Prerequisite: Dietetics majors only; successful completion of undergraduate dietetics knowledge core requirements; must be in good academic standing. Supervised practice in dietetics in different settings, including clinical simulations, acute and long-term care facilities, rehabilitation and outpatient clinics, community programs, food science, and food service operations. Includes weekly seminar. Course Fee: DNPF $100; LRHC $10; STHC $30.

NDT 4943. Special Studies in Nutrition and Dietetics. (3-0) 3 Credit Hours.
Prerequisite: Consent of Instructor. Organized course offering the opportunity for specialized study in an area of nutrition and dietetics not available as part of the regular course offerings. Special Studies may be repeated for credit when topics vary, but not more than 6 semester credit hours, regardless of discipline, will apply to a bachelor's degree. Course Fees: LRHC $10; STHC $18; DL01 $75.
